

InfraSpector

Industrial NIR Spectrometers

**JEFFCO InfraSpector II Model IS02
NIR Diffuse Reflectance Spectrometer**

InfraTester

NIR Presentation System

Team the IS02 InfraSpector with the InfraTester IT02 Presentation System for a fast, clean and repeatable way to present samples for accurate NIR analysis.

- * Solid state diode array technology
- * Thermoelectric cooling for stability
- * Long life stable halogen light source inbuilt
- * Spectralon white standard inbuilt
- * Xenon wavelength standard inbuilt
- * Robust sealed sapphire glass view window
- * Optics and electronics sealed to IP54
- * Wide aperture optics (~50mm Ø)
- * Nominal 900-1700nm bandwidth
- * Integrated with Camo The Unscrambler®
- * Developed and manufactured in AUSTRALIA
